"Marge-scale screening of intracellular protein localization in living fission yeast cells by the use of a GFP-fusion genomic DNA library."; Genes Cells 5:169-190(2000).

1- FUNCTION: INVOLVED IN OXIDATIVE STRESS. TRANSCRIPTION FACTOR THAT ACTS UPON TRR1 AND CTY1.

1- SUBSCLULTAR LOCATION: Nuclear (Potential) BLONGS TO THE HSP FAMILY.

1- SIMILARITY: IN THE N-TERMINUL SECTION; BLONGS TO THE HSP FAMILY.

1- SIMILARITY: CONTAINS 1 RESPONSE REGULATORY DOMAIN.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            SEQUENCE FROM N.A., AND FUNCTION

conversion of pyruvate to acetyl-CoA and CO(2). It contains
multiple copies of three enzymatic components; pyruvate
dehydrogenase E1), dihydrolipamide acetylrransferase (E2) and
lipamide dehydrogenase [83).

SUBUNIT: Homodimer (By similarity).
SUBURIT: HOMOdimer (By similarity).
SUBCELLULAR LOCATION: Cycoplasmic (By similarity).
SIMILARITY: BELONGS TO THE HEAT SHOCK PROTEIN 90 FAMILY.
PUNCTION: THIS IE PROTEIN IS A MULTIFUNCTIONAL PROTEIN CAPABLI
OF MIGRATING TO THE NUCLEUS, BINDING TO DNA, TRANS-ACTIVATIES
OTHER VIRAL GENES, AND AUTORECULATING ITS ON SYMTHESIS. IT IS
REQUIRED FOR THE SWITCH FROM IMMEDIATE-EARLY TO EARLY MODE OF
